

MODULAR CLEAN-ROOM AUTOMATION AS FULL SERVICE

maximizing your benefits

Planning
Realization
Operation

Maximizing your benefits; with us as your automation / digitalization partner for your entire cleanroom automation – from planning to implementation, everything from a single source.

Modular full service for planning, automation and digitalization

Your benefit: Everything from a single source

- Single point of contact (SPOC)
- Faster communication avoiding redundancy
- Cost savings by reducing the number of specialists needed to be contacted
- Cost reduction through the use of standard hardware components (synergy)
- Added value in functionality

Planning

Planning phase

- Optimal end-to-end concepts achieved through the early involvement of specialists in the planning phase

Realization

Realization phase

- Optimal technical solutions through close integration of existing systems
- Additional functionality with fewer interfaces
- Resource efficiency through integration of control systems into existing automation systems
- Conserving resources through joint use of IT/OT systems
- Resource efficiency through multidisciplinary commissioning
- Use of standardized documents in the qualification and validation processes

Operation

Operating phase

- More efficient operating processes through multidisciplinary maintenance, troubleshooting, expansions, and modifications
